## Letter of Reference

Re: ITA Phoenix Construction, Inc.  
Swimming Pool Renovation

We selected ITA Phoenix Construction to complete a renovation project to our 40 year old, residential, in-ground swimming pool. The project included repairs to significant cracking and complete resurfacing of the concrete pool deck, replacement of the ladder, steps and diving board and re-plastering of the entire pool interior. The pool now looks brand new and we are very happy with the quality of the final product.

Throughout the work, Fenelon Pimenta was very professional, honest, fair and responsive to our telephone and text inquiries. We feel that he wanted the project to be successful and that he did his best to meet his client's expectations.

As an Engineer and Project Manager, I am very familiar with construction related projects and relationships with contractors. I enjoyed working with Fenelon and his staff and would have no problem recommending them or using them again for similar projects in the future.

Signed:

David Jaeger
